

Tau Chemicals Inc

MACROPOL 370

TECHNICAL DATA SHEET

Description:

Macrolub 370 is an unsaturated long-chain fatty acids ester, yellow-orange colored. Excellent internal lubricant with low-cloud point used for laminating of PVC films.

Application:

It's widely used as a nonionic surfactant and emulsifier.

Macrolub 370 has FDA approval for use in the following sections:

| 21 CFR | Section title |
|----------|-------------------------------------------------------------|
| 175.000 | Resinous and polymeric coatings. |
| 175.320 | Resinous and polymeric coatings for olefin films. |
| 181.27 | Plasticizer. Food ingredients previously approved. |
| 184.1323 | Directory of food substances affirmed and known to be safe. |

In PVC is an excellent internal lubricant and helps to dispersion of pigments, giving better brightness. Not recommended its use in combination with lead basic salts.

Dosage:

0.5 to 1.5 P.H.R.

Packing:

Store in a cool dry place, away from ignition sources and the Drums must be kept hermetically closed.

Storage:

Plastic drums / 180 Kg.
